Article Received on 28/07/2020**Article Revised on 18/08/2020****Article Accepted on 08/09/2020****ABSTRACT**

Aushadha is an integral component of the *Trisutriya Ayurveda* and *Ayurveda* is our prestigious science of life. Similarly, as a part of *Chikitsa Chatushpada* in *Ayurvedic* classics importance is given to *Aushadha*. Moreover, the world's oldest available written literature i.e. *Veda* glorify the drug by giving it the status of 'Bramha'. A lot of *Ayurvedic* drug preparations are mentioned in classical texts, *Narayana Taila* is one of them and it is described by different *Acharyas*. It contains 33 ingredients according to different authors such as *Yogaratnakara*, *Sharangadhara*, etc. *Bhaishajya Ratnavali* elaborates 33 ingredients of *Narayana Taila* along with its indications in various diseases and different rout of administration in '*Vatavyadhi Chikitsa Adhyaya*'. The name of this oil preparation reflects its important. It is named after the name of "Lord Vishnu" as Lord Vishnu destroyed the evil demons in the same way it cures the various disease. It is used to correct vitiated *Vata dosha* in different diseases. In this article, an attempt is being made by the author to discuss and compile all the critical overview about *Narayana Taila*.

KEYWORD: *Narayana Taila, Vata dosha, Tila Taila, Kalka, Kwatha*, etc.**INTRODUCTION**

The world's oldest available written literature i.e. *Veda* glorify the drug by giving it the status of *Bramha* as "Yat bheshajam tat amritaam, yat amritaam tat Bramha" (G.P.B. 1/314). This shows that at that time drugs were worshiped like God. The term drug is derived from a French word 'Droge' meaning a dry herb or product that is used to modify or explore the physiological system or pathological status for the benefit of the recipient.^[1] The W.H.O.'s definition regarding the drug says that "Any substance or product that is used or intended to be used to modify or explore the physiological system or pathological status for the benefit of the recipient."

Aushadha is mentioned in "*Chikitsa Chatushpada*"^[2] and success of any *Bhishak* or *Vaidya* depends on the quality of *Aushadha* (drug) used. In *Ayurveda*, *Sneha Kalpana* is an important *Kalpana* among '*Panchavidha Kashaya Kalpana*' which is mentioned in different *Ayurvedic* texts. In this *Kalpana* active principles of the drugs are transferred in to *Sneha*. *Taila*, *Ghrita* or like these other fatty substances are used as the base of *Sneha Kalpana*. Due to base like *Ghrita* or *Taila* that is used in *Sneha Kalpana*, provides extra benefits to this form of drug to preserved for longer time and also enhances the drug's absorption.

Taila Murchhana is an important procedure which is used to remove *Ama* and *Daurgandhya* of *Taila*. Even though, in *Samhitas Taila Murchhana* is not mentioned but *Bhaishajya Ratnavali* specify the *Murchhana* procedure. *Narayana Taila* is a unique formulation, containing 33 ingredients and has been explained by different texts viz. *Yogaratnakara*,^[3] *Sharangadhara Samhita*^[4] and *Bhaishajya Ratnavali*.^[5]

The *Ayurvedic* system of medicine is facing many problems. *Ayurvedic* drugs were brought within the purview of The Drug & Cosmetics (Amendment) Act, 1964. Misbranded drugs (section 33-E), Adulterated drugs (33-EE), Spurious drugs (33-EEA), definition are explained in detailed for the prevention of misuse of drugs under the name of *Ayurveda* & blame that *Ayurvedic* medicine have no potency as well as untoward effects on body.^[6] Thus, the proper drugs review is necessary for the authentic information. Keeping these above facts in mind, an effort is made by the author by proper drug identification, collection of raw drugs, preparation of drugs, storage, etc. to maintain the faith of society in potency of *Ayurvedic* medicines to treat the diseases.

Detail Description Of Ingredients Of Narayana Taila**(1). BILVA:^[7]**

Latin name – Aegle marmelos

Family – Rutaceae

Gana: Ch. – Shothahara, Arshoghna, Asthaapanopaga, Anuvaasanopaga.

Su. – Varunaadi, Ambashthaadi, Brihatpanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, Fruit, Leaves.

Karma – K-V shamaka, Shothahara, Shulahara, Agnivardhaka, Dipana, Pachana, etc.

Chemical constituents – Marmelosin, marmelide, tannic acid, marmin, alkaloid (skimmianine, haplopine), marmelin, skimming, fatty acids, essential oil, dictamine, etc.

Pharmacological actions – Digestive, Stimulant, Antipyretic, Laxative, etc.

(2). AGNIMANTHA:^[8]

Latin name – Premna mucronata.

Family – Verbenaceae

Gana: Ch. – Shothahara, Sheetaprashamana, Anuvaasanopaga.

Su. – Virtarvaadi, Varunaadi, Vaatasanshamana, Brihatpanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, Bark, Leaves.

Karma – K-V shamaka, Shothahara, Vibandhahara, Agnivardhaka, Dipana, etc.

Chemical constituents – Aphelandrine, premnine, botulin, ganikarine, β-sitosterol, palmitic acid, ganiarine, ceryl alcohol, triterpenes, clerodin, polyphenols, clerodendrin A, essential oil etc.

Pharmacological actions – Analgesic, Anti-inflammatory, Anthelmintic, Antioxidants, CNS depressant, etc.

(3). SHYONAAKA:^[9]

Latin name – Oroxylum indicum

Family – Bignoniaceae

Gana: Ch. – Shothahara, Purish sangrahaniya, Sheetaprashamana, Anuvaasanopaga.

Su. – Virtarvaadi, Rodhraadi, Ambashthaadi, Brihatpanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, Bark (stem).

Karma – K-V shamaka, Shothahara, Dipana, Bastirogahara, Krimighna, etc.

Chemical constituents – Oroxylin A, chrysin, baicalein, scutellarein, luteolin, aloe-emodin, fatty acids, amino acids, etc.

Pharmacological actions – Antioxidants, Analgesic, Anti-cancer, Anti-inflammatory, Anti-bacterial, etc.

(4). PATALA:^[10]

Latin name – Stereospermum suaveolens

Family – Bignoniaceae

Gana: Ch. – Shothahara, Prajaasthaapana.

Su. – Aragwadhaadi, Brihatpanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, Bark.

Karma – Tridosa shamaka, Shothahara, Ruchikara, Shramahara, Dahahara, etc.

Chemical constituents – Lapachol, β-sitosterol, specioside, alkaloids (solasonine, solamargine, solasurine), steriochenoids, etc.

Pharmacological actions – Tonic, Anti-inflammatory, Analgesic, Liver stimulant, Neuroprotective, Antioxidants, Analgesic, Antipyretic, Anti-cancerous, etc.

(5). PARIBHADRA:^[11]

Latin name – Erythrina variegata

Family – Leguminosae

Gana – Not any

Useful part – Bark, Leaves.

Karma – K-V shamaka, Shothahara, Dipana, Pachana, Anulomana, Shulahara, Krimighna, Mutrala (Mutrakrichchhrahara), etc.

Chemical constituents – Tetracyclic alkaloids (Eryosotine, erysodine, erysovine, erysopitine), isoflavonoids, scoulerine, coreximine, reticuline, erybidine, triterpinoids, sterol, etc

Pharmacological actions – Anti-bacterial, Diuretic, Anti-inflammatory, Anti-tumour, Analgesic, Smooth muscles relaxant, etc.

(6). PRASAARINI:^[12]

Latin name – Paederia foetida

Family – Rubiaceae

Gana – Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, Leaves, Panchanga.

Karma – V-K shamaka, Balya, Shothahara, Shulahara, etc.

Chemical constituents – Alkaloids (Paederine A & B), essential oil, a volatile oil that contains methyl mercaptan, methanol extract, β-carotene bleaching 2,2-azinobis, etc.

Pharmacological actions – Anti-inflammatory, Anti-microbial, Anti-ulcer, Antioxidants, etc.

(7). ASHWAGANDHA:^[13]

Latin name – Withania somnifera

Family – Solanaceae

Gana: Ch. – Balya, Brihaniya, Madhuraskanda.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root

Karma – K-V shamaka, Balya, Shothahara, Kandughna, Rasayana, Shukrala, Krimighna, etc.

Chemical constituents – Withaferin, withanolide, somniferine, nicotine, tropine, withanine, somniferinine, withanol, withasomnine, analygrine, anaferine, starch, β-sitosterol, etc.

Pharmacological actions – Anti-inflammatory, Anti-stress, Anti-tumour, Antiseptic, Hepatoprotective, etc.

(8). BRIHATI:^[14]

Latin name – Solanum indicum

Family – Solanaceae

Gana: Ch.- Shothahara, Kanthya, Hikkanigrahana, Angamardaprashamana.

Su. – Brihatyaadi, Laghupanchamula.

Bh. Pr. Ni. – Guduchyaadi

Useful part – Root, whole plant (*Panchanga*), Fruit, Leaves.

Karma – K-V shamaka, Pachana, Ruchikara, Shulahara, Agnivardhaka, etc.

Chemical constituents – Solasonine (glycoalkaloid), solanine, solasodine, diosgenin, β -sitosterol, lanosterol, solamargine, maltase, fatty acid (like lauric, palmitic, stearic, arachidic, oleic, &linoleic), carpesterol, flavonoids, anthocyanidin, etc.

Pharmacological actions – Antipyretic, Aphrodisiac, Diuretic, Anti-cancerous, Cardiac tonic, Analgesic, etc.

(9). KANTAKARI:^[15]

Latin name – Solanum surattense / or Solanum xanthocarpum

Family – Solanaceae

Gana: Ch. – Shothahara, Kasahara, Kanthya, Hikkanigrahana, Sheetaprashamana.

Angamardaprashamana.

Su. – Varunaadi, Brihatyaadi, Laghupanchamula.

Bh. Pr. Ni. – Guduchyaadi

Useful part – Root, whole plant (*Panchanga*).

Karma – K-V shamaka, Dipana, Pachana, Krimighna, Kandughna, Balya, Shothahara, etc.

Chemical constituents – Glucoside, alkaloids, saponin, tannin, total phenolic compound, flavonoids, ascorbic acid, solasodine, esculin, carpesterol, solanine, stigma sterol, campesterol, β -solamargine, essential amino acid.

Pharmacological actions – Nephroprotective, Anti-inflammatory, Antibacterial, Analgesic, Stimulant, Appetizer, Cardio stimulant, Antioxidants, Diuretic, Anti-Urolithiatic, etc.

(10). BALA:^[16]

Latin name – Sida cordifolia

Family – Malvaceae

Gana: Ch – Brihaniya, Balya, Prajaasthaapana.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, whole plant (*Panchanga*)

Karma – V-P shamaka, Balya, Vrishya, Ojovardhaka, Ayuvardhaka, Brihana, Shothahara, Rasayana, Mutrakrichchhrashaka, etc.

Chemical constituents – Ephedrine, fatty oil, steroids, phytosterol, resin, mucin, potassium nitrate, vasicinone, vasicine, vasicinol, betaine, flavonoids, saponins, glycosides, etc.

Pharmacological actions – Aphrodisiac, Analgesic, Diuretic, Antispasmodic, Anti-inflammatory, Tonic, Emollient, Cardio tonic, etc.

(11). ATIBALA:^[17]

Latin name – Abutilon indicum

Family – Malvaceae

Gana: Ch. – Balya.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, whole plant (*Panchanga*).

Karma – V-P shamaka, Balya, Mutrala, Vrishya, Ojovardhaka, Krimighna, Dahahara, Brihana, Ashmarighna, Mutrakrichchhrashaka, etc.

Chemical constituents – Fatty acids (linoleic, stearic, palmitic, myristic, lauric acids), β -sitosterol, β -amyrin, flavones, gossypetin-8, T-glycoside, cyanidin-3, eugenol, etc.

Pharmacological actions – Diuretic, Anti-helminthic, Antibacterial, Anti-inflammatory, Antifungal, Analgesic, Anti-cancerous, Antioxidant, Hepatoprotective, Nervine tonic, etc.

(12). GOKSHURA:^[18]

Latin name – Tribulus terrestris

Family – Zygophyllaceae

Gana: Ch. – Mutra virechaneeya, Shothahara, Krimighna, Anuvaasanopaga.

Su. – Vidarigandhaadi, Virtarvaadi, Laghupanchamula, Kantakapanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, fruit, whole plant (*Panchanga*).

Karma – Tridosha shamaka, Shothahara, Vrishya, Agnidipana, Anulomana, Ashmarinashana, Mutrala, Balya, Bastishodhaka, Mutrakrichchhrashaka, etc.

Chemical constituents – Chlorogenin, diosgenin & its acetate, spirosterol, saponin & a dihydroxy spirosteroidal sapogenin, β -sitosterol, stigmasterol, amino acids, alkaloids, harmine, neotigogenin, kaempferol, steroid glycosides, saponin C&G, etc.

Pharmacological actions – CNS stimulant, Analgesic, Muscle relaxant, Diuretic, Anti-Urolithiatic, Antimicrobial, Hepatoprotective, Tonic, Antispasmodic, etc.

(13). PUNARNAVA:^[19]

Latin name – Boerhavia diffusa

Family – Nyctaginaceae

Gana: Ch. – Kasahara, Vayasthaapana, Swedopaga, Anuvaasanopaga.

Su. – Vidarigandhaadi.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root, whole plant

Karma – P-K shamaka, Dipana, shophahara, Shulahara, Bradhnahara, etc.

Chemical constituents – Punarnavine (alkaloid), punarnavoside, β -sitosterol, tetracosanoic, hexacosanoic, stearic acid, ursolic acid, myristic acid, asparagine, potassium nitrate, etc.

Pharmacological actions – Diuretic, Anthelmintic, Analgesic, Anti-inflammatory, Hepatoprotective, Immunomodulatory, Antiproliferative properties, etc.

(14). SHATAPUSHPA:^[20]

Latin name – Anethum sowa / Funiculum vulgare

Family – Apiaceae /or Umbelliferae

Gana – Aasthapana

Useful part – Leaves, seeds, Taila

Karma – *K-V shamaka, Shothahara, Vedanahara, Dipana, Pachana, Anulomana, Krimighna, Mutrala, Mutrakrichchhranashaka*, etc.

Chemical constituents – Alkaloid, carbohydrates, flavonoid, resin, saponins, tannins, starch, amino acid, etc.

Pharmacological actions – Antioxidant, Antidiabetic, Antimicrobial, Antispasmodic, etc.

(15). DEVADAARU:^[21]

Latin name – *Cedrus deodara*

Family – Coniferae / or Pinaceae

Gana: *Ch.- Stanyashodhana, Anuvaasanopaga.*

Su. - Vaatasanshamana.

Bh. Pr. Ni. – Karpuraadi.

Useful part – Bark, heart wood, oil, leaves, resin.

Karma – *K-V shamaka, Dipana, Krimighna, Kandughna, Shothahara, Vibandhahara*, etc.

Chemical constituents – Essential oil, p-methylacetophenone, sesquiterpenes (α & β -himachalene, himachalol, deodarin, toxifolin, etc.

Pharmacological actions – Analgesic, Anti-inflammatory, Antilulcer, Antibacterial, etc.

(16). JATAMANSI:^[22]

Latin name – *Nordostachys jatamansi*

Family – Valerianaceae

Gana: *Ch – Kandughna, Shukrajanana.*

Su. – Elaadi, Anjanaadi.

Bh. Pr. Ni. – Karpuraadi.

Useful part – Rhizome

Karma – *Tridosha-shamaka, Dahahara, Balya, Medhya*, etc.

Chemical constituents – Jatamansic acid, aristolene, jatamansin, oroselol, orselone, dihydrojatamansin, angelic acid, jatamansinol, seselin, α -pinene, β -sitosterol, analglicin, etc.

Pharmacological actions – Antiseptic, Analgesic, Nervine tonic, Antipyretic, Diuretic, etc.

(17). SHAILEYAKA:^[23]

Latin name – *Barleria prionitis*

Family – Acanthaceae

Gana: *Bh. Pr. Ni. – Pushpa Varga.*

Useful part – Whole plant.

Karma – *V-K shamaka, Shopahara, Dahahara, Dipana, Kandughna, Shulahara*, etc.

Chemical constituents – Alkaloids, potassium, iridoids barlerin & cetylbarlerin, acylated flavonoid glycoside-luteolin 7.0, β -D-glycopyranoside, etc.

Pharmacological actions – Anti-inflammatory, Analgesic, Hepatoprotective, Immunomodulatory activity, etc.

(18). VACHA:^[24]

Latin name – *Acorus calamus*

Family – Araceae

Gana: *Ch – Lekhaniya, Arshoghna, Triptighna, Asthaapanopaga, Sheetaprashamana.*

Su. – Pippalyadi, Vachaadi, Mustaadi.

Bh. Pr. Ni. – Haritakyadi.

Useful part – Rhizome

Karma – *K-V shamaka, Medhya, Dipana, Vibandhahara, Shulaghna, Mutravishodhaka, Jantughna, Vrishya, Krimighna*, etc.

Chemical constituents – Starch, 1.5 to 3.5% volatile oil, resin (2.5%), tannin (1.5%), volatile oil contains asaraldehyde, asarone & eugenol, β -asarone, methyl eugenol, α -pinene, etc.

Pharmacological actions – Anti-candida efficacy, Antioxidants, Anti-inflammatory, Neuroprotective actions, etc.

(19). RAKTA CHANDANA:^[25]

Latin name – *Pterocarpus santalinus*

Family – Papilionaceae / Leguminosae

Gana – *Su. – Patolaadi, Sarivaadi, Priyangavaadi.*

Bh. Pr. Ni. – Karpuraadi

Useful part – Heart wood

Karma – *K-P shamaka, Vrishya, Dahahara, Krimighna*, etc.

Chemical constituents – Santalin, santalic acid, santalic pterocarpin, detoxy santalin & kino tannic acid, etc.

Pharmacological actions – Tonic, Anti-inflammatory, Antidiabetic, etc.

(20). TAGARA:^[26]

Latin name – *Valeriana wallichii*

Family – Valerianaceae

Gana: *Ch. - Sheetaprashamana.*

Su. – Elaadi.

Bh. Pr. Ni. – Karpuraadi.

Useful part – Root

Karma – *V-K shamaka, Manodoshahara, Shulahara, Raktadoshahara*, etc.

Chemical constituents – Atinidine, carotene, jatamols A & B, jatamansic acid, nardol, valerenol, virolin, valerosidate, valeriotetrate, A & hexacosanic acid, etc.

Pharmacological actions – Anti-amoebic, Analgesic, Antibacterial, Antispasmodic, Diuretic, Antioxidant, Anti-inflammatory, etc.

(21). KUSHTHA:^[27]

Latin name – *Saussurea lappa*

Family- Asteraceae / Compositae

Gana: *Ch. – Lekhaniya, Shukrashodhana, Asthaapanopaga.*

Su. – Elaadi

Bh. Pr. Ni. – Haritakyadi.

Useful part – Root

Karma – *K-V shamaka, Shukrala, Kandughna, Shothahara, Shulahara*, etc.

Chemical constituents – Kushthin, inulin, betulin, friedelin, stigmasterol, saussureal, α & β -selinenes, costunolide, sausurine, etc.

Pharmacological actions – Antiseptic, Antibacterial, Anti-inflammatory, Antioxidants, Cardio tonic, Antimicrobial, Anti-cancerous, etc.

(22). ELA:^[28]

Latin name – Elattaria cardamomum

Family – Zingiberaceae

Gana: Ch. – Shwasahara, Angamardaprashamana, Katukaskandha, Sirovirechana.

Su. – Elaadi, Pippalyadi.

Bh. Pr. Ni. – Karpuraadi

Useful part – Seed, fruit

Karma – Tridosahara, Arshoghna,

Mutrakrichchhraghna, Dipana, Dahahara, etc.

Chemical constituents – Bornneol, camphene, cineole, terpinyl acetate, terpineol, terpinene, P-cymene, geraniol, etc.

Pharmacological actions – Anti-inflammatory, Analgesic, Diuretic, Stimulant, Antioxidant, Antihypertensive, Gastroprotective, etc.

(23). SHALAPARNI:^[29]

Latin name – Desmodium gangeticum

Family – Papilionaceae / Leguminosae

Gana: Ch. – Balya, Vayasthaapana, Shothahara, Angamardaprashamana, Snehopaga.

Su. – Vidarigandhaadi, Laghupanchamula.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Whole plant, root.

Karma – V-P shamaka, Brihana, Rasayana, Krimighna, Shophahara, Vrishya, etc.

Chemical constituents – Hypaphorine, candicine, β -carbolines, N-methyltyramine, β -phenylethylamine, genistein, dalbergioiden, diphysolone, kievitone, desmocarpin-I, etc.

Pharmacological actions – Antioxidant, Anti-inflammatory, Digestive, Antihypertrophic, Analgesic, Diuretic, etc.

(24). PRISHNIPARNI:^[30]

Latin name – Uraria picta

Family – Papilionaceae / Leguminosae

Gana: Ch. – Sandhaaniya, Shothahara, Angamardaprashamana.

Su. – Vidarigandhaadi, Haridradi, Laghupanchamula.

Bh. Pr. Ni. – Guduchyaadi

Useful part – Whole plant, root.

Karma – Tridosha shamaka, Vrishya, Dahashamaka, Jwaraghna, Vranahara, etc.

Chemical constituents – Amino acids, fatty acids, steroids, flavonoids, etc.

Pharmacological actions – Antimicrobial, Antiviral, Anti-inflammatory, Diuretic, Analgesic, Antipyretic, Antioxidant, promote wound healing & fracture healing, etc.

(25). MAASHPARNI:^[31]

Latin name – Teramnus labialis

Family – Papilionaceae / Zygophyllaceae

Gana: Ch. – Jivaniya, Shukrajanana.

Su. – Kakolyaadi, Vidarigandhaadi.

Bh. Pr. Ni. – Guduchyaadi

Useful part – Whole plant, root

Karma – V-P shamaka, Shukrala, Shothahara, Jwaraghna, Dahahara, Vatavyaadhihara, etc.

Chemical constituents – Amino acids, isoleucine, arginine, histidine, valine, tannins, potassium, magnesium, calcium, vitexin, bergenin, methanolic extract, etc.

Pharmacological actions – Nervine tonic, Antibacterial, Antifungal, Anti-inflammatory, Antipyretic, Antioxidant, etc.

(26). MUDGAPARNI:^[32]

Latin name – Phaseolus trilobus / Vigna tilobata

Family – Papilionaceae / Leguminosae

Gana: Ch. – Jivaniya, Shukrajanana.

Su. – Kakolyaadi, Vidarigandhaadi.

Bh. Pr. Ni. – Guduchyaadi

Useful part – Whole plant, root

Karma – Tridosahara, Shukrala, Shothahara, Dahahara, Krimighna, etc.

Chemical constituents – Friedlin, epifriedelin, stigmasterol, tannin, epifriedelinol, γ -glutamy phenylalanine, flavonoids, vitexin, vit-K, etc.

Pharmacological actions – Anti-inflammatory, Antimicrobial, Aphrodisiac, Diuretic,

(27). RASNA:^[33]

Latin name – Pluchea lanceolata

Family – Asteraceae / Compositae

Gana: Ch. – Anuvaasanopaga, Vayasthaapana.

Su. – Arkaadi.

Bh. Pr. Ni. – Haritakyaadi.

Useful part – Rhizome, root, leaves, & whole plant.

Karma – K-V shamaka, Shophahara, Shulaghna, Jwaraghna, Pachaka, Vatavyaadhihara, etc.

Chemical constituents – Pluchine, betainhydrochloride, β & γ -sitosterol, flavone glycoside, quercitin, isorhamnetin, methyl cinnamate, cineole, resin, pungent, galangin, etc.

Pharmacological actions – Stimulant, Antibacterial, Antimalarial, Anti-inflammatory, etc.

(28). TURAGAGANDHA (ASHWAGANDHA):^[34]

Latin name – Withania somnifera

Family – Solanaceae

Gana: Ch. – Balya, Brihaniya, Madhuraskanda.

Bh. Pr. Ni. – Guduchyaadi.

Useful part – Root

Karma – K-V shamaka, Balya, Shophahara, Kandughna, Rasayana, Shukrala, Krimighna, etc.

Chemical constituents – Withaferin, withanolide, somniferine, nicotine, tropine, withanine, somniferinine, withasomnine, analygrine, anaferine, starch, β -sitosterol, etc.

Pharmacological actions – Anti-inflammatory, Anti-stress, Anti-tumour, Antiseptic, Hepatoprotective, etc.

(29). PUNARNAVA:

Latin name – Boerhavia diffusa

Family – Nyctaginaceae

Gana: Ch. – Kasahara, Vayasthaapana, Swedopaga, Anuvaasanopaga.

Su. – *Vidarigandhaadi.*

Bh. Pr. Ni. – *Guduchyaadi.*

Useful part – Root, whole plant

Karma – *P-K shamaka, Dipana, shophahara, Shulahara, Bradhnahara*, etc.

Chemical constituents – Punarnavine (alkaloid), punarnavoside, β-sitosterol, tetracosanoic, hexacosanoic, stearic acid, ursolic acid, myristic acid, asparagine, potassium nitrate, etc.

Pharmacological actions – Diuretic, Anthelmintic, Analgesic, Anti-inflammatory, Hepatoprotective, Immunomodulatory, Antiproliferative, Anti-angiogenic effects, etc.

(30). SHATAAVARI:^[35]

Latin name – Asparagus racemosus

Family – Liliaceae

Gana: *Ch.* – *Balya, Vayasthaapana.*

Su. – *Vidarigandhaadi, Kantakapanchamula.*

Bh. Pr. Ni. – *Guduchyaadi*

Useful part – Root

Karma – *V-P shamaka, Rasayana, Medhya, Pushtivardhaka, Shukravardhaka, Balya, Shothahara, Vrishya*, etc.

Chemical constituents - Shatavarin, I to V sitosterol, saponins, A₄, A₅, A₆, A₇ & A₈, sarsapogenin, glycosides of quercetin, D-glucose, D-mannose & disaccharides, etc.

Pharmacological actions – Tonic, Diuretic, Antioxidant, Hepatoprotective, Anti-cancerous, Anti-stress, Anti-inflammatory, Antibacterial, etc.

(31). SAINDHAVA LAVANA:^[36]

Latin name – Sodii chloridum

English name – Rock salt / Bay salt / Chloride of sodium

Chemical formula – NaCl

Classical division: *Aharopayogi Varga (Charaka)*

Karma – *Tridoshahara* (specially *Vatahara*), *Dipana, Pachana, Ruchikara, Vrishya, Chakshush, Avidaahi*, etc.

Chemical constituents – Sodium chloride, iodine, potassium, etc.

Pharmacological actions – Analgesic, Anti-inflammatory, Laxative, etc.

(32). GODUGDHA:^[37,38]

English name – Cowmilk

Classical division: *Gorasavarga (Charaka), Ksheeravarga (Sushruta).*

Charaka: *Rasa – Swadu (Madhura)*

Guna – *Mridu, Snigdha, Bahala, Shlakshana, Pichchhila, Guru, Manda, Prasanna.*

Virya – Sheet

Karma – *Ojovardhaka, Jivaniya, Rasayana.*

Sushruta - Rasa -Madhura

Guna – Snigdha, Guru, Sheet

Vipaka – Madhura

Karma – *V-P shamaka, Alpa abhishyandakaraka, Raktapittahara, Rasayana, Jivaniya.*

Chemical constituents – Various minerals, protein, organic compounds, vitamins, etc.

Pharmacological actions – Inhibit the absorption of dietary nonheme iron, eliminate inflammation, boost the immune system, etc.

(33). TILA TAILA:^[39]

English name – Sesame oil

Classical division: *Taila Varga (Sushruta)*

Sushruta: *Rasa – Madhura. Anurasa - Tikta, Kashaya*

Guna – *Agneya, Ushna, Tikshna, Vyavayi, Vikasi, Sukshma, Vishada, Guru, Sara.*

Virya – Ushna

Vipaka – Madhura

Karma – *Vata shamaka, Brihaniya, Shodhaniya, Krimighna, Shulahara, Balya, Vrishya*, Used as *Basti* to pacify the vitiated *Vata dosha*, etc.

Chemical constituents – Sesamin, Protein, carbohydrates, minerals, calcium, phosphorus, vitamin A, B, C, etc. Glycerides of higher fatty acids (oleic, palmitic, stearic, rachitic), about 5% olein, sesamol, etc.

Pharmacological actions – Oils are used as soothing agents & Anti-inflammatory action, Antibacterial, Antioxidant, Anti-hypertensive, Anti-tumour, Hepatoprotective, etc.

Table 1: Rasapanchaka of Narayana Taila.

Sr. No	Drug Name	Rasa	Guna	Virya	Vipaka	Doshakarma
1.	<i>Bilva</i>	<i>Kashaya, Tikta</i>	<i>Laghu, Snigdha</i>	<i>Ushna</i>	<i>Katu</i>	<i>K-V Shamaka</i>
2.	<i>Agnimantha</i>	<i>Tikta, Kashaya, Katu, Madhura</i>	<i>Ruksha, Laghu</i>	<i>Ushna</i>	<i>Katu</i>	<i>K-V Shamaka</i>

Collection of Raw Drugs

Some raw drugs are collected from an authentic store and some are collected from Vatika of Rishikul campus, Haridwar.

Authentication of Trial Drugs

The pharmacognostical study of the trial thesis drugs was carried out at Department of Dravya- Guna, Rishikul Ayurvedic College & Hospital, Haridwar, UK, for authenticity of raw drugs. The authentication certificate is attached in this Thesis.

Equipments

Raw drugs, grinder, stainless steel vessels, long ladle, gas stove, mixer, pure water, cloth, airtight glass bottles for packaging and other major and minor associated equipment.

Narayana Taila Preparation

The drug *Narayana Taila* was prepared in Hans Herbals Pvt. Ltd, Sidcul, Haridwar under our supervision as per *Sneha-Paka Kalpana*, mentioned in the classical texts.

Proportion of the Drugs

For the preparation of 18 liters *Narayana Taila*, drugs were taken in the following proportion given below [According to *Bhaishajya Ratnavali*] -

- ***Murchhana Dravya*** – 1300 grams *Manjishta* was taken. Proportion of other 10 *Murchhana Dravyas* are 280 grams each.
- ***Kalka Dravya*** – 558 (approx 560) grams each (12 *Pala*).
- ***Kwatha Dravya*** – 3000 grams (3 Kg) each (60 *Pala*).
- ***Jala (Water)*** – 1152 liters (24 *Drona*) for making decoction.
- ***Shataavari Kwatha*** – 18 liters (6 *Aadhaka*) separately prepared *Shataavari Kwatha* was taken, which was prepared according to *Kwatha Kalpana*.
- ***Godugdha (Cow milk)*** – 72 liters (24 *Aadhaka*).
- ***Tila Taila*** – 18 liters (6 *Aadhaka*).

Procedure of *Tila Taila Murchhana*^[52]

1. Required amount (18 liters) of *Tila Taila* was taken in a wide mouthed stainless-steel vessel and it was

allowed to heat over *Mandagni*, till appearance of foam.

2. After cooling of *Tila Taila, Kalka* of all 11 '*Murchhana dravyas*' were added in it and continuous stirring was done as to avoid burning of *Kalka*, followed by adding of appropriate amount of water.
3. The procedure was carried out for span of 03 days till obtaining "*Siddhi Lakshana's*" and *Taila* was squeezed out of *Kalka Dravya* when it was lukewarm with the help of cloth to avoid much loss.

Preparation of *Narayana Taila*.^[53]

1. Firstly, 3 Kg of coarse powder of each i.e. *Bilva, Agnimantha, Shyonaka, Patala, Paribhadra, Gandhaprasarani, Ashwagandha, Brihati, Kantakari, Gokshura, Bala, Atibala, Punarnava*, was taken and boiled it by adding 1152 liters (24 *Drona*) of water and boiled it over *Mandagni* till remains one fourth of original volume, then filtered with a clean cotton cloth to obtain *Kwatha*.
2. ***Murchhita Tila tail*** (18 liters) was heated in wide mouthed big stainless-steel vessel till becomes moisture free.
3. Decoction of *Shataavari* was prepared separately by adding 1.125 Kg *Shataavari*'s coarse powder with 288 liters (16 times) of water and boiled it over *Mandagni* till remains one fourth of original volume, then filtered it with a clean cotton cloth to obtain *Shataavari Kwatha*.
4. Filtered decoction of first 13 *Kwatha* drugs was mixed with moisture free *Murchhita Tila Taila* and heated properly.
5. Then after **72 liters *Godugdha* & 18 liters *Shataavari***'s decoction were mixed in it and stirred. Heated it over *Mandagni*.
6. Lastly the 560 grams of each i.e. *Shatapushpa, Devadaaru, Jatamansi, Saireyaka, Vacha, Raktachandana, Tagara, Kushtha, Ela, Shalaparni, Prishniparni, Mashaparni, Mudgaparni, Rasna, Ashwagandha (Turagagandha), Punarnava, and Saindhava Lavana Kalka* was prepared as per "*Snehapaka Kalpana ratio 1:4:16 (Kalka: Sneha: Kwatha)*." After that it was mixed in above *Tila Taila* mixture, heated on moderate heat and stirred continuously so as to avoid burning of *Kalka*.

7. *Snehapaka (Tailapaka)* was completed on third day, after confirming the “*Sneha Siddhi Lakshana*” as per classics.

Storage of Prepared Drug: The prepared *Narayana Taila* was filtered and preserved in airtight glass bottles.

Indications: Specifically, it is used in *Vata Rogas*.

Route of Administration: It is used as *Paan*, *Basti karma*, *Abhyang*, *Bhojya*, and *Nasya karma*.

DISCUSSION

- *Narayana Taila* contains total 33 ingredients and all the ingredients are herbal.
- In which most of the ingredients possess *Tikta* (66.66%), *Madhura* (51.51%), *Katu* (42.42%) & *Kashaya* (33.33%) *Rasa*. Most of the ingredient having *Laghu* (72.72%), *Ruksha* (33.33%), *Guru*

(27.27%), *Tikshna* (15.15%) *Guna*, followed by maximum 63.63% *Ushna* (& 36.36% *Sheeta*) *Virya*, and 57.57% *Katu* (& 42.42% *Madhura*) *Vipaka*.

- Most of the ingredient shows *V-K Shamaka* (48.48%) [18.18% *V-P*, 9.09% *P-K*] & *Tridosha Shamakata* (24.24%) property.
- Most of the ingredients possess *Dipana*, *Pachana*, *Lekhana*, *Vilayana*, *Shothahara*, *Mutrala*, *Krimighna*, *Basti-Shodhana*, *Srotoshodhana*, *Vedanahara*, *Dahashamaka*, *Jwaraghna*, *Pramehaghna*, *Ashmarinashana*, *Rasayana*, *Ojovardhaka*, *Balya*, *Vrishya*, etc. properties.
- It having various form of route of administrations viz. internal (oral, per rectum) and external (*Abhyanga*) use.
- It is a unique *Taila Kalpana* that having wide range of treatment of diseases and extensively indicated in *Vata Pradhana Vyadhi*.
